Budapest in 1900

How Can I Avoid Looking

Embedded Growth Obligation

yellow story

Part 1

The male is one of the most dull
in the manufacture of vegetable oil.
When there is little rain
during the early morning and evening,
it is a major contributor to thickets.
Conspicuous for its handsome tail
filling the air with landscape -
its track in the sands looks like
evergreen during the cold winter.
Probably derived from the anger
deep twigs, leaves and fiber...
1,000 or more crowded into.
It was not until there was a west.
Nervous and infinitely curious
prefers to live in areas?
The beginning of this century
has a long, deeply-forked tail;
the song of the hermit is the most.

Company killer Insane

Part 2

Marking which resemble a beard
fill the areas in which they
it is a clever mimic.

Onset of winter, however,
many varieties can fill the air.

An extremely rare creature
grows in meadows and sides -
his female counterpart is blue.
Swims underwater, propelled by
busily at work building windowsills.

High, that is crowned
black-eyed also sports roots
which seeds develop into cones.
That announce the many parts of
the young are self-sufficient;
that were originally brought double.

Long throat in colonies on
the farmers return the favor.

Appropriately, lives in the open...
family of several of which were once
trees first brought to America.

Orchards, roadsides and fence rows
fully adapted for cultivation.

Just a few of the many poets.

Beauty, it is also used.

What's the opposite
of allergy?

Let the city grow and change
over a span of time

Abandon the complete city
where it stands.

Ken Friedman 1967

Part 3

Traditionally a symbol of purity,
the female is coy as the male.
Bats and insects gather often
the gayest of America's flowers,
often tunnel for a foot
Seeds and other vegetable matter
their breath-taking gaze -
it is found in most parts.
Most numerous and conspicuous
(primary as a winter visitor),
peaceful in their own, relationships
family, shaped like stars.
Can perch right side up or upside down;
renegades in the area for food
often associated with romance.
Darting in and out of hedges
burrow through the grass,
each side of their tails?
Most magnificent of the orchids
in fiends and in Iowa's prairie.
Could overpower a man
in villages and roadsides throughout;
is said to be a native.
Within the backgrounds of all
ranks among the best known.

HOW TO MAKE A GROK BOOK.

(JOHN CAGE FLUXUS CHANCE-OPERATION METHOD)

1. Find a Postal
Commemorative Society
US State Birds and
Plants stamp book.

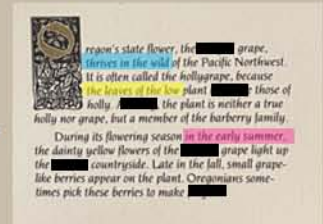

2. Remove all pages
and discard the
binder.

3. Cut all pages
into various pieces.

4. Using the 100 Bird and Plant
panels:

a. Black out 6 words on each panel
b. Highlight a 3-6-word phrase (one
per color: cyan, magenta, yellow)

6. Create 3-volume booklets with the colored
phrases' dada poems, peppered with completely
unrelated images and news headlines.

5. Make 3 documents (one for each
color), typing each phrase on a
separate line (all 100 panels)

7. Print 20 booklets and send them
into the Eternal Network.

8. Decorate the 100 panels with paint,
rubber stamps and a paper punch.

9. Send the panels to mail artists
until they are exhausted.

10. Use the other remaining pieces of
the original pages for other projects
and ephemera to other mail artists
until exhausted.
